

GripFit Rotary 45

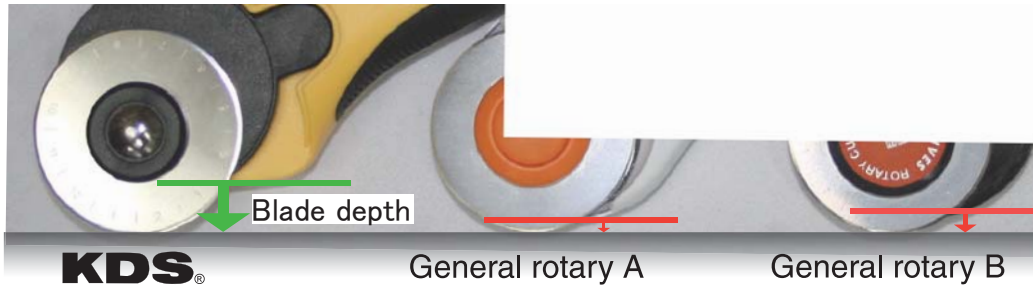

Muratec-KDS is introducing a 45mm Grip Fit Rotary cutter with Ergonomic grip. Designed for safety and easy handling, the RT-45 has unique flexible blade guard and comfortable handle for both Right and Left-handers. Goods are expected ready for delivery in January, 2014.

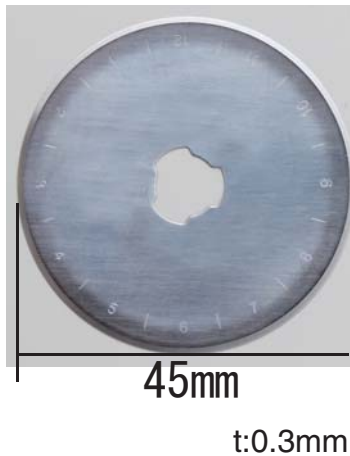

Movable blade guard

The depth of blade with KDS RT-45 can be adjusted by movable blade guard. This function might useful when cutting multiple-layer fabric or multiwall objects. Other rotary cutter has limited blade depth due to fixed blade guard.

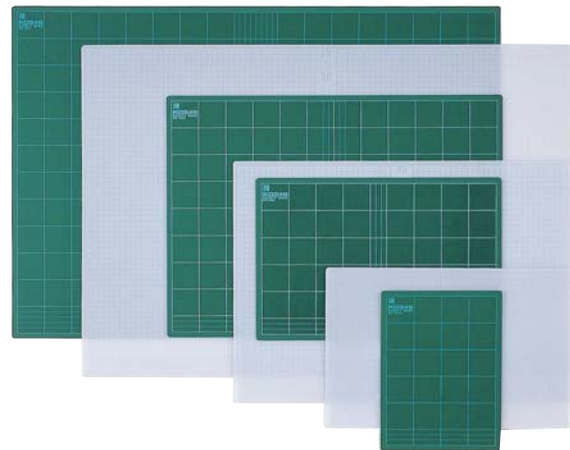

Spare blades

1 blade on card

Safety-Bases

We recommend users to use mats for protecting work area and extending the blade edge. KDS offers a variety of sizes in Safety Bases line-up.

Cat.No.	Length	P'KG	N.W	G.W	M3
RT-45	Grip Fit Rotary 45	96 pcs (12pcs x 8)	10 kg	11 kg	0.054
